### EXPERIENCE

#### Technical Product Owner

Éutika · October 2024 – present

- I contribute to product evolution and to the coordination between business and technical teams so that projects move forward with clarity and alignment.
- I help turn ideas and needs into implementable solutions, identifying misalignments and connecting different parts of the process.
- I stay actively involved in the technical side, especially in development, automation, data handling, and AI-related tools.
- I work on digital projects in the education sector, combining big-picture thinking, practical execution, and internal coordination.

#### Software Developer

Éutika · June 2023 – October 2024

- I worked on the development of digital solutions for different projects, combining software development, automation, data handling, and the creation of internal tools.
- I contributed to projects built with technologies such as TypeScript, React, Python, and SQL, adapting to very different technical needs depending on the context.
- During this stage, I also started taking on more cross-functional responsibilities, connecting technical work, coordination, and product evolution.
